

Announcement

Exams (including retakes) and training for CTFL-AT are only available until the sunset dates (6 May 2027 for English, 6 November 2027 for non-English).

Candidates seeking Agile testing knowledge and skills will find relevant content in the ISTQB® Certified Tester Foundation Level v4.0 (CTFL), where Agile concepts are included within a broader testing foundation, and in the Certified Tester Advanced Level Agile Tester v2.0 (CTAL-AT) for advanced Agile testing expertise.

Overview

The ISTQB® Foundation Level Agile Tester (CTFL-AT) certification provides the key testing skills necessary to successfully contribute to an Agile project. CTFL-AT covers agile testing in alignment with the principles of agile software development as outlined in the Agile Manifesto. A tester on an Agile project will work differently than one working on a traditional project. Testers must understand the values and principles that underpin Agile projects, and how testers are an integral part of a whole-team approach together with developers and business representatives.

More Information

Training is available from Accredited Training Providers (classroom, virtual, and e-learning). We highly recommend attending accredited training as it ensures that an ISTQB® Member Board has assessed the materials for relevance and consistency against the syllabus.

Self-study, using the syllabus and recommended reading material, is also an option when preparing for the exam.

Holders of this certification will be eligible to proceed to the next stage of the Agile stream and take the Agile Technical Tester (CTAL-ATT) and Agile Test Leadership at Scale (CTAL-ATLaS) certifications.
