

How to Create a Mobile Testing Strategy in Three Steps

It used to be that when you left your apartment, you checked to make sure your keys and wallet were with you. Today, your smartphone is priority number one. So much of our daily routine is influenced by a smartphone that we literally feel handicapped without it.

According to GSMA Intelligence, more than 5 billion people worldwide currently use smartphones and mobile phones; that is two-thirds of the global population. [In total, those 5 billion people making more than 9 billion mobile connections worldwide.](#) No other device in the history of mankind has experienced such rapid market penetration. Entire areas of life are now influenced by the devices, and applications are now being (visibly and rather inconspicuously) integrated into cars, wearable technology, home appliances, and more to come.
